Service - Complimentary password management solution

In partnership with Dashlane

Remembering passwords is difficult. Remembering secure, complex passwords for every account you use can be almost impossible. The answer is Dashlane, the all-in-one solution that remembers and automatically fills in your passwords, logins, personal info, and payment details–quickly and accurately. With the secure sharing feature, your colleagues can even use your logins without ever seeing your password. Strong passwords are the key to staying secure online, and Dashlane makes it simple.

Included free with our Cyber ERM policies, Dashlane offers a suite of advanced tools to help secure and control all your online information. With its built-in VPN, Dashlane encrypts online activity on unsecure Wi-Fi networks to always keep personal information safe and private. Dashlane also offers Dark Web monitoring, which scans the web and alerts you immediately if your personal information is ever found where it doesn't belong, so you can take action quickly.

The programme

Eligible cyber policyholders have free access to:

- Dashlane Premium password management and digital protection solution for up to 500 employees
- 12-month license term
- 20% discount on the Dashlane Business enterprise solution

Benefits

- Improve cybersecurity by making it easier to create strong passwords and change weak ones
- Benchmark the passwords you currently use to help identify and correct risky accounts and behaviors
- Automatically log in to websites so you don't have to remember or type passwords
- Receive instant security alerts to your computer or mobile device when websites you have an account with experience a breach
- Change multiple passwords with the click of a button without leaving the app

- Synchronise and back up passwords across multiple devices so you can access them securely anywhere
- Enroll up to five email addresses in Dark Web Monitoring to receive alerts if any personal information associated with those email addresses is found on the dark web
- Encrypt, store, and access up to 1 GB of sensitive files in Dashlane
- Browse more securely online with a built-in VPN and unlimited data across an unlimited number of desktop and mobile devices
