

Work from Home
Insurance

CHUBB®

A group insurance plan to help employers care for the health, safety and well-being of their employees while working from home (WFH).

The traditional work environment has fragmented into different types of work spaces, with employees now digitally connected by video and teleconferencing applications.

Working from home can result in feelings of isolation due to social separation and changes in work demands may lead to fatigue. Employees are also exposed to inconsistent workstation ergonomics, home hazards such as stairs and unkept toys.

Even after the COVID-19 pandemic has passed, working from home may remain a part of every employee's work week and expectations.

Policy Coverage

Work from Home Perils

Mental Health Support

- **USD500** per employee

Ergonomics Injury

- **USD2,000** for surgery

Domestic Perils: Burns

A payment to employees for serious burns received as a result of cooking while working from home.

Mobile Office

A payment if an employee needs or chooses to take their work outside and suffers an Accidental Death or Permanent Disability. Includes a daily benefit up to 14 days for any extended leave required following a serious injury.

Ergonomic Tips for Working from Home*

Check out these simple steps you can take to optimise your posture and improve your comfort when working at home.

1. Select your work space

- Select a work space and chair that allows your keyboard to be located at or just below elbows height when your shoulders are relaxed, and your elbows are about 90 degrees.
- If this is not possible, get creative and utilise a cushion or folded blanket to raise you up.

2. Maintain a good posture

Upper back straight with shoulders relaxed at your side.

To help with back comfort, find a small pillow or roll a towel and place it where your belt lies at the small of your back.

Seat height adjusted so the thighs are parallel to the floor.

Feet firmly supported by the floor, use a footrest if necessary.

Elbows at 90 degrees with wrists straight.

Leg room should be free of obstructions.

Monitor located approximately arm's length with top of monitor at eye level.

Consider a soft surface just in front of your keyboard for your wrists. A folded hand towel or tee shirt should work.

Keyboard at the same height as the elbows and mouse located next to the keyboard.

3. Consider standing occasionally while working

- Get creative and utilise your kitchen island or an ironing board as the standing desk.
- Ensure your table height is set to the level of your elbows.
- Standing for up to 20 minutes at a time is recommended while longer durations are not advised.
- If you feel tension in your hips and thighs, take a break and sit.
